INT. CL. : H01J 29/48 H01J 29/04

TITLE : ELECTRON GUN FOR CATHODE-RAY TUBE

ABSTRACT : PURPOSE : To provide a cathode-ray tube which can control a beam spot to be small without causing the deterioration of the electron emission surface of a cathode.

CONSTITUTION: A first grid G₁ has a hole 4 for transmitting a beam on its top and is formed in the shape of a cone or a truncated cone. The electron emission surface 9 of a cathode K is so formed as to have an outer curved surface of a protruding part facing against the first grid G₁. The distance between the first grid G₁ and the electron emission surface 9 of the cathode K is so constituted as to be substantially equal.
